

## Biosketch

### Genming Zhao, MD

Genming Zhao, M.D., Ph.D., is a Professor of Epidemiology at the School of Public Health, Fudan University where he has worked for more than 30 years. Dr. Zhao's main research areas are focused on epidemiology and control of infectious diseases, such as *Schistosomiasis*, pneumococcal pneumonia, influenza, etc. Over the past ten years, he has been involved in several key projects as the principal investigator, including the "China Eastern Cohort Study" supported by the National Key Research and Development Program. He has also led international collaborations such as "The epidemiological study on children with pneumonia in Suzhou, China" which was supported annually by the China-US Collaborative Program on Emerging and Re-emerging Infectious Diseases. He also drafted "National Control Strategies for Emergent Infectious Diseases in China". Since 2010, he has received more than 30 million Yuan in research support and published more than 250 papers, including articles published in international journals. He was awarded the Excellent Teacher award by the Shanghai Bureau of Education and Fudan University. Visit Genming's organizational profile (in Chinese) at <http://sph.fudan.edu.cn/t/134>
