Access to the data presented was managed by Statistics New Zealand under strict micro-data access protocols and in accordance with the security and confidentiality provisions of the Statistic Act 1975. Our findings are not Official Statistics. The opinions, findings, recommendations, and conclusions expressed are those of the researchers, not Statistics NZ

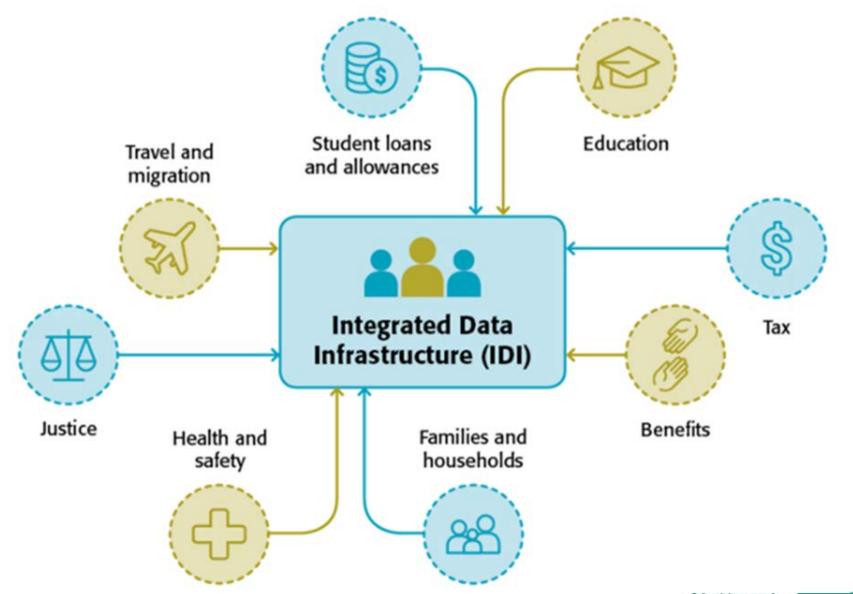

Primary work thus far...

- Kim et al. Agreement between parents, teachers, and Pacific children's perceptions of academic performance at age 6 years: findings from the Pacific Islands Families Study. *Assessment in Education: Principles, Policy & Practice* (under review)
- Schluter et al. Do pre-school developmental indicators predict the future utilization of early primary school-based literacy interventions: a national population study. *Child Development* (under review)
- Schluter et al. Predicting early primary school-based literacy interventions amongst Pacific children: a national population study. Scientific Reports (under review)
- Several other papers in preparation:
- Māori children; PIF study prediction; GUiNZ

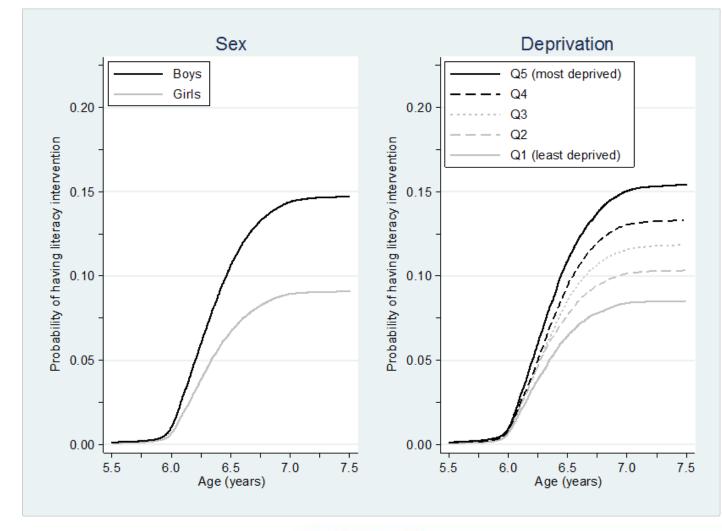

National study: following the B4SC

- N=255,093 children aged 4 years had B4SC between: 1 July 2010 & 30 June 2015
- By 31 December 2015, 20,652 (8.1%)
 children had received at least
 one literacy intervention ('reading recovery'
 or 'specialist teaching')
- all considered demographic (sex, domicile area, level of deprivation) and B4 School Check variables (hearing, vision, body weight, behaviour, development) were significantly related to receiving a literacy intervention

Important ethnic differences

	Adjusted ^a	
n	HR	(95% CI)
129,366	1	(reference)
23,394	1.34	(1.27, 1.40)
17,076	1.33	(1.26, 1.41)
20,175	0.47	(0.43, 0.51)
34,293	1.22	(1.17, 1.27)
4,677	1.17	(1.06, 1.29)
5,838	1.00	(0.90, 1.10)
5,421	1.12	(1.01, 1.23)
14,853	0.74	(0.69, 0.80)
	129,366 23,394 17,076 20,175 34,293 4,677 5,838 5,421	129,366 1 23,394 1.34 17,076 1.33 20,175 0.47 34,293 1.22 4,677 1.17 5,838 1.00 5,421 1.12

Note: adjusted for sex, domicile area, level of deprivation, and ethnicity.

Important ethnic differences

However, the full statistical model lacked reasonable predictive power for population screening purposes
