

CSA Forum - Disclosure of Interest Register

Last updated: 15 July 2021

The Forum is committed to transparency and equity. It is proactive in identifying potential conflicts of interest. A conflict of interest is any situation in which the interests of Forum members seem to conflict with those of the Forum. This interest can be direct or indirect, and it can include the interests of organisations and people connected to the Forum member.

Forum members will recuse themselves from Forum activities where a significant conflict is identified. The severity of a potential conflict will be agreed by the Forum in the absence of the member with the potential conflict, as appropriate.

All Forum activities, discussions and papers are strictly confidential and may not be shared without written permission from the Chair.

Purely personal interests (eg family trusts) are not listed here but should be proactively declared, as necessary, where there could be any potential real or perceived conflict.
