

## **Student Testimonial Joanna Zhong - China**

I'm a Year 12 student who has been studying at The Friends' School for one and a half years. As an international student who comes from China, I found The Friends' School is a fantastic place to study.

Firstly, The Friends' School has an excellent studying atmosphere. Everyone enjoys studying at Friends'. The relationship between teachers and students is incredibly great. We can get lots of useful information that we need from our teachers. All of the teachers are very professional and patient.

Secondly, we have complete infrastructure and teaching equipment for all the demands. For Example, there are great laboratories for us to do scientific experiments; huge amount of book collections from all areas in the library to name a few.

Thirdly, The Friends' School is not only a good place to study, but an excellent place to develop students all-round abilities. Since I came to The Friends' School, I found my all-round abilities have been greatly developed.

Coming to The Friends' School is a very important and wise step in my life. I think I'm getting more and more closer to my aim of life.
