The below list comprises all text book titles which appear on the Clemes booklist above but with the additional details of their ISBN so that you can ensure any second hand copies are the correct edition being used in 2019. Prices listed are correct as at 1 November 2018 and are subject to change.

ISBN numbers are unique and are also used as the barcode number. Check the barcode on the rear of the book, if it has been obscured by book covering the ISBN number can also be located in the first few pages of the book where the publisher information is listed.

A note on terminology

Different publishers use different terms to describe their items.

Text book, course book or student book is used to describe a book that is a reference source so second hand copies can be utilised so long as the student has the correct edition. For some subjects, students will require access to the digital resources as well as the text book and where this is the case the booklist contains information about purchasing the digital resources separately if you have a second hand copy of the text.

Workbook or activity book is used to describe a book where student writes directly into the book with their answers. These are not able to be used second hand and students will require a new copy.

Obook and ebook refers to the digital resources offered by the publisher to support the hard copy of text book and what is included and the length of time the digital resource is available varies between titles and publishers.
