

People's actions produce change in the natural environment.

Dear Parents and Families,

You are invited to come and share our learning on **Tuesday, April 23rd 2019.**

Our Grade 1 students have been inquiring into Mother Earth and her wonders. They have been guided through the Inquiry Cycle and looking to these 3 Key Questions to guide their research.

In what ways are humans responsible for our planet? (Responsibility)

What causes dangerous situations and habitat changes for animals? (Causation)

How do people's actions affect the environment, both good and bad? (Change)

Our students have been researching their chosen animal and now have some information to share with you and others to show how can people help and what is our responsibility.

Come and listen, view and read the information research that we have been engaged with for the past seven weeks. Come and see how WE can make a difference.

We hope that you can make it and have some time to spend with your child looking at their work and also look around speaking with other children and finding out about their research.

Looking forward to seeing you all then.

Kind Regards,
Grade One Team

Event Information

Date: **Tuesday 23rd April**

Two Sessions – Please note the time for your child's class.

Session 1 Time: **8:45 am – 9:45am. Classes 1HN and 1MH**
