

Stop dropping rubbish

St Mary's will be a better place if everyone in the school stopped dropping rubbish on the ground. There are many reasons to stop dropping rubbish on the ground.

Firstly we need to stop dropping rubbish because when the rain comes it blows it the drain. This then take the rubbish into the ocean. Rubbish in the ocean can kill the animals that live in the sea. If you don't want all the beautiful animals in the sea to die, STOP DROPPING RUBBISH on the ground.

Secondly you should make a better choice before you drop rubbish on the ground. When you pack your lunch try not to bring plastic outside because if you drop it on the ground it makes a problem. But if you did not bring it out there will be no problems.

Finally it's very bad to drop rubbish on the ground. And that means that you are not being a stewed. It is very bad to wreck God's creation. God made it for the beautiful animals and I don't like them to die. It also makes our school look really messy and uncared for.

It is simple that we should make our school and the world a better place by not littering. If we all stop dropping rubbish on the ground there will not be any loss of the animal's habitat, sea animals won't die and you will be making a better choice. STOP DROPPING RUBISH ON THE GROUND TODAY and become a better steward.

Bu Luke, Term 2,2012
