

Task 1: English –

Here are some notes that have been taken whilst watching a documentary. Your task is to write a paragraph of what you interpret the documentary to be about.

- Droughts occur when there is not enough water to sustain people, plants and animals for an unusual period of time
- four types – meteorological, agricultural, hydrological, socioeconomic
- Droughts can continue even when there has been some rainfall.
- famine
- frequent and severe
- Australian often has droughts
- 2002 – 2003 drought killed livestock and livelihoods of farmers
- long periods without rain
- El nino
- causing erosion, harming animals, causing people to pay more for food, and affecting our water supplies

Task 2: Maths – Percentages

Find 5 *different items* of your choice. For each item work out the following:

- How much money would you save if there was a sale with **25%** off?
- How much money would you save if there was a sale with **15%** off?
- How much money would you save if there was a sale with **5%** off?
- How much money would you save if there was a sale with **30%** off?

Task 3: Mindfulness - Meditation

Download the Smiling Minds app from the App Store (free). Complete 2 meditations from the programs for your age group.

Write a reflection after you have finished the meditation to include the following:

- What was the meditation called?
- What was the meditation topic?
- How did you feel during and after the mediation?
- Would you do this meditation again?
- What are the physical and mental benefits of meditation?

Task 4: Inquiry – Questions

Continue to research your Inquiry question. Make sure you update posts on your blog. You must include a reference list (You can check last week's homework on how to do this).
