Task 1: PERSUASIVE WRITING – IPAD TASK

Step 1:

For this task you must **select one** of the following images to **create a persuasive radio ad**. Radio ads are 30 seconds long that aim to persuade an audience to either buy and/or use a product. These type of ads often state: why you should invest, where you can find the product, how much it costs and really push the benefits of a product.

Step 2:

Write a script for your ad in your homework book using the persuasive devices you have learnt about in class:

- Emotive Language
- The power of 3 (3 adjectives)
- Rhetorical Questions
- Facts and Statistics

To help you: Think about why YOU like it. How could you encourage someone else to want the product?

Step 3:

RECORD your ad using an app of your choice on your iPad. Make sure you use a clear and expressive voice. Your Teacher is looking forward to hearing your best presenting voice! You may even like to add some light music in the background if you wish.

Task 2: SPELLING

In your homework book practise your spelling words however you wish.

Suggestion: You may like to create a table of the pairs of homophones with little sketched images showing the different meanings of the words.

Week 3

Homophones
(their, there, they're,
were, where, wear,
we're)

allowed
aloud
desert
dessert
wear
where
we're
their
they're

Task 3: Maths – RAINFALL CATCHMENTS IN MELBOURNE

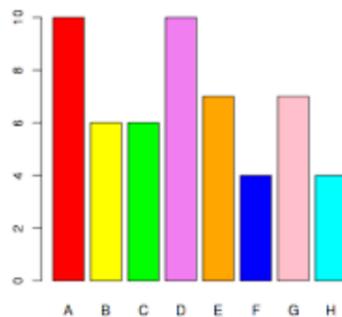

Go to the following website:

<https://www.melbournewater.com.au/waterdata/rainfallandriverleveldata/Pages/Rainfall-and-river-level-new.aspx>

(a direct link is back on the blog post).

Select 5 – 10 catchments that show the rainfall in the last 7 days around Melbourne.

In your homework book draw a column graph that shows each catchment you have selected and the amount of rainfall that has occurred.

**This will be explicitly modeled in the classroom when homework is explained*

Extension Task (optional): Create a digital copy of your graph using the app: numbers or pages
