

Maths Scrabble!

Mathematics: This game allows your child to practise manipulating numbers to achieve a desired result.

How to play: To decide who goes first, work out which player's birthday comes first in the year. Then play the game as you would normally play scrabble, however, instead of playing to make words you are playing to make number sentences. Use the table below to work out your score.

E.g. $15 + 5 = 20$ would give me a score of $(1 + 3 + 1 + 3 + 1 + 1 + 1)$ 11

Number/Operator	How Many	Score value
1	5	1
2	5	1
3	5	2
4	5	2
5	5	3
6	5	2
7	5	4
8	5	2
9	5	2
0	5	1
+ (add)	7	1
- (subtract)	7	1
× (multiply)	5	2
÷ (divide)	5	3
² (square)	2	3
(square root)	2	3
= (equals)	20	1
blank	4	0
