

One More or One less!

Mathematics: The focus of this game is on number recognition and identifying the number that comes before or after another number.

How to play: The player rolls a 6 sided dice. They identify the number they have rolled and can decide if they would like to choose the number that comes before that number or after that number. They place a counter on (or colour in) their choice on the game board. The first player to get four in a row wins.

2			6	5
	4			3
7			6	
4		5		7
	3		2
