Unit 8: ‘A fair go’—Rules, laws and the settling of disputes

Discipline-based Learning

English: AusVELS Level 5/6

AusVELS EAL Stages B2 and B3

Domain: Physical, Personal and Social Learning

Civics and citizenship: Community engagement AusVELS Level 5/6

Students explore the differences between rules and laws, why we have them, what role they serve, and how they can be changed. They contribute to the development and support of classroom rules. They develop an understanding of the qualities of good laws, the importance of laws applying equally to everyone in a democracy, and the ways that laws are made.

Students learn about the processes of making and changing laws and the role of the courts and police. They consider important principles such as the independence of the judiciary, equality before the law.

Prior knowledge:

This unit of work was written for a Year 5 and 6 class made up mainly of students for whom the English language plays only a small role in life outside school. Despite the length of time many students have spent in Australia (some were born here), concern remains about their general level of English language confidence and competence. This raises the importance for teachers at the school to provide maximum opportunities for English language learning and use, and in explicitly teaching the language of new topic areas.

This topic requires the students to use different text-types when speaking, reading and writing. Modelling of text-types and suggestions to assist students to use them is specified in the planner. This is part of an ongoing emphasis on explicit teaching of the structures and features of different text-types, and activities have been chosen to target text-types that students have already had experience with many times before.

The EAL teacher assisted in planning the unit, and in an EAL class addressed particular areas which the Stage B2 EAL students’ needed additional and more explicit assessment. The EAL teacher also provided an initial introduction to the unit, for the EAL students, pre-teaching some vocabulary.

Students will also complete a unit of work on the Victorian parliament, and will then visit Parliament.
**Unit name:** ‘A fair go’—rules, laws and the settling of disputes

**AusVELS/content objectives:** Civics and citizenship: Community engagement

To enable students to understand and talk about and write about the following:
- What rules and laws are
- The main differences between rules and laws
- The fact that rules and laws operate at home, school and in the wider community.
- The fact that rules and laws aim to ensure fairness for everyone.
- Who makes laws and rules ie—parents, teachers and people’s representatives in governments
- How laws are made, amended or repealed in response to community needs or changes in society.
- The fact that laws guide the settling of disputes.
- The fact that laws in different places reflect the beliefs and values of that society.

**Main text focus**

<table>

</table>

**Topic specific vocabulary**

Legal/government terms and definitions: Commonwealth or Federal government, State Government and Local Government, Upper House / Legislative Council, Lower House / Legislative Assembly, a bill, the first reading, the second reading, the third reading, a law, a rule, to pass a bill into law, to repeal a law, to amend a law, politicians, parliament, premiers, members of parliament, MPs, a citizen etc

**Linguistic structure focus**

- Text type: Explanation:
  - Definition of rules and laws
  - The difference between rules and laws
  - Why we have rules and laws
  - Who makes rules and laws and how

**EAL focus**

- Text type: written explanations
- Use of appropriate tense in text types
- Use of modals to express possibility and obligation
- Use of conditionals to express hypothetical consequences
- Using the language of argumentation: asking for and giving opinions, agreeing and politely disagreeing
- Clarity, confidence in expressing ideas and arguments both orally and in writing

**Resources**

Factual texts about rules and law making, ‘Learning about the law’
*Inside the parliament of Victoria – Primary activity workbook*

Excursion to State Parliament

Guest speaker: school principal

**Functions**

**Classroom learning**

- arguing
- classifying
- establishing limits
- evaluating
- hypothesising
- identifying
- judging
- offering
- persuading
- planning
- predicting
- requesting
- sequencing
- warning

**Getting things done**

- comparing
- clarifying
- describing
- explaining
- instructing
- inquiring
- justifying
- questioning
- reporting
- suggesting
- inviting
- generalising
- brainstorming
- listing

**Maintaining communication**

Expressing:

- apologising
- appreciation
- approval
- certainty
- concern
- frustration
- indifference
- intention
- needs/wants
- preferences
- probability
- regret
- gratitude/thanks

</table>

- Reflect on, use and evaluate effective oral communication strategies:
  - evaluate the speech of themselves and others, in response to known criteria
  - talk about and practise the strategies that enhance interaction in small groups
  - discuss the strategies that different speakers use to influence their audience
  - talk about the need to change spoken interaction according to the needs of the audience.

- Use a wide range of strategies for reading and accessing information from different texts:
  - talk about different strategies for accessing challenging texts and reading for different purposes
  - plan research topics and develop focus questions
  - take notes when reading and viewing
  - identify and locate appropriate information and present for different audiences.

- Use the distinguishing structures and features of common text-types:
  - use and talk about how text features assist the reader, e.g. vocabulary choice, punctuation
  - talk about how particular features of grammar are characteristic of particular text-types
  - use and talk about text organisation that assist the reader, e.g. paragraphing, headings, indexes

- Write to develop familiar ideas, describe events and present information:
  - write a range of factual texts to fulfill particular purposes
  - write a range of fictional texts to fulfill particular purposes
  - give information in graphic form, e.g. maps, diagrams, graphs
  - share and talk about their own writing.
### Teaching and learning activities

**1. Focus: Tuning in**

**KWL: Rules and laws.** Finding out what students already know and what they want to know about rules and laws, the teacher will need a large chart to elicit and write up what students know, what they want to know and eventually what they have learned about rules and laws and the settling of disputes. If possible keep the charts on display in the classroom.

**Part 1:** In small groups, ask students to brainstorm and list rules or laws that they know exist, under the following categories:

- In their homes
- In school
- In the classroom
- In the community eg: road laws, legal or illegal activities, laws to do with property, personal safety, age related laws (Pictures or posters of community laws would be useful to activate students schema about the topic)

Groups verbally report back their ideas.

Teacher elicits ideas and includes the rules and laws onto a large poster in each section of the Knowledge section according to whether they are rules that students follow at home, in school or whether they are related to the wider community.

**Part 2:** In small groups, ask students what else they know about rules and laws and to note down a few ideas for sharing

Teacher elicits ideas and includes them in the Knowledge section on the large poster

**Part 3:** In small groups, ask students to brainstorm what they would like to know about rules and laws

Teacher elicits questions and includes them in the What would I like to know section on the large chart

(The 'What I have learned' section can be completed at later points in the unit)

**Part 4: What is the difference?** In small groups students discuss the difference between rules and laws, and who has to obey them. For example, we all have to obey the laws, but some rules will be different in other people’s homes or schools.

Elicit and reinforce, consolidate and extend their ideas.

### Linguistic focus

**Linguistic features**

- Note the language structure of laws and rules—clear statements of positive or negative ideas.
- Help students to notice and use the following patterns:
  - imperatives, e.g.
    - Work in pairs.
    - Write in your books
  - negative imperatives, e.g.
    - Do not run inside the school.
    - Do not shout at each other
  - semi modals and modals to express obligation and permission e.g.
    - You have to drive on the left in Australia
    - You have to vote in Australia
    - You must have a licence to drive a car.
    - You can drive if you are over 18.
    - You can drink alcohol if you are over 18
  - conditionals
    - You can drive if you are over 18.
    - You can drink alcohol if you are over 18
    - If you are over 18 you can vote

### Assessment for learning ideas

**Learning intentions:**

**TO BE COMPLETED**

**Observation**

The KWL is designed to engage students in their learning. The ‘Knowledge’ section helps students to activate their schema on the topic and make explicit what they already know about so that they can then use what they already know about rules and laws to try to make sense of the new ideas they learn throughout the unit. The ‘What I want to know’ section helps students to be motivated about their learning as they progress through the unit, to see if they can answer the questions they set at the beginning. Students can develop more questions to answer as they progress through the unit. They can complete the ‘What I have learned’ section as they complete ‘blocks’ of the unit. This helps students to reflect on their learning, to articulate their learning and in so doing both make sense of and consolidate their learning. Thus engaging student throughout the learning process. (The ‘What I have learned’ section can be completed at later points in the unit)

**Content**

Observe students as they work together in their groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting the level of students awareness of rules and laws outside their immediate context. Note how wide a knowledge of societal rules/laws they possess and determine how much scaffolding students will need.

As students present their group ideas, make a note of any common causes of confusion or uncertainty. After the presentation, question, reconstruct and give feedback on any issues that seem to be causing confusion.

**Provide delayed feedback on problem areas as necessary**

**Language**

As students report back their answers and questions in Parts 1, 2 and 3 observe how clearly the rules and laws are expressed. Are they able to use appropriate linguistic patterns as they express rules and laws? Are they able to formulate questions? Ask the whole class to help restructure some of the rules and laws as they are written up and highlight some of the patterns

**Provide delayed feedback and additional language focused activities as necessary.**
2. Focus: If rules and laws didn’t exist...

Part 1: Consequences
Select a number of rules/laws from across the categories (but emphasising community rules) and ask the students in small groups to imagine and make a poster about what the consequences would be if certain rules or laws did not exist. The consequences should be listed under two headings:

- **Personal consequences**
- **Consequences to society**

These consequences would be mainly negative, although students may see personal consequences as positive, or a mixture of both. Model a class example first, then let the students experiment with their own group ideas. E.g.

- If people drove cars on either side of the road ... we would have lots of accidents.
- If everyone carried a gun ... I think that accidents would be likely.
- If children didn’t have to go to school, they would be very bored.
- If there were no health rules for restaurants ... people might not clean their kitchens properly.

Ask students to write three or more consequences.

Show students the success criteria and ensure they understand it.

Allocate feedback buddy groups. So for example if there are 18 students in the class and 6 groups of three, Group A, Group B, Group C, Group D, Group E and Group F – Group F can be the feedback buddies for Group A, Group A can be the feedback buddies for Group B, Group B can be the feedback buddies for Group C etc etc.

Groups pin up their poster and present their ideas.

Feedback buddies make notes about their presentation on the criteria sheets and give the written feedback to their buddies.

**Part 2: Discussion and elicitation of the following:**

Having explored the consequences of NOT having certain rules and laws students should now be in a good position to begin articulating why rules and laws exist.

Individually students think about this question and make a note of their ideas.

In pairs or small groups students discuss and share their ideas.

Elicit and write up ideas on a poster.

For example:

- Rules make things fairer for everyone.
- Rules and laws make things safer for everyone.
- Laws must apply to everyone.

**Linguistic focus**

**Linguistic Features**

Emphasise the use of the conditional form after *if* for hypothesising.

- *We use* *if* *with past tenses and would, could or might to express a hypothetical situation,* e.g.

**Consequences** can be expressed:

- *If everyone dropped their rubbish on the ground...*  
  - I would feel ...
  - people might + inf verb
  - no one would + inf verb
  - other people might + inf verb
  - there would be

The modal form in these examples is used to express possibility and probability. A language clinic with ESL students could revisit and follow up on use of this language—the difference between might and would.

**Assessment for learning ideas**

**Observation**

**Content:**

Observe students as they work together in their groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting how extensively and logically or otherwise the students are able to talk about the consequences of the absence of specific laws. Ask questions to see if students can consider the consequences from more than one perspective. Ask them questions to see if they are able to predict multiple consequences. E.g.

*If there were no road laws, there would be lots of accidents, then we would need more hospitals and more doctors and nurses and this would be very expensive.*

**Provide delayed feedback on problem areas as necessary.**

**Language:**

During group speaking and writing opportunities, observe and notice how effectively the students were using the linguistic features. Question and provide immediate, on the spot verbal feedback as necessary to groups and individuals. Make a note of some of the common problem areas and as feedback to each section, ask the whole class to help restructure some of the patterns used to talk about consequences of the absence of specific rules and laws in Part 1 and the reasons for laws and rules in Part 2 - as they are written up, highlighting some of the patterns.

**Provide delayed feedback and additional language focused activities as necessary.**

**Self and Peer feedback for presentation and poster**

<table>
<thead>
<tr>
<th>Communication</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>You had good eye contact</td>
<td></td>
</tr>
<tr>
<td>You spoke clearly and loudly</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Content</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Your consequences were sensible</td>
<td></td>
</tr>
<tr>
<td>You included consequences from different perspectives</td>
<td></td>
</tr>
<tr>
<td>You included some multiple consequences</td>
<td></td>
</tr>
<tr>
<td>Your poster was attractively designed</td>
<td></td>
</tr>
<tr>
<td>Two things we liked about your presentation and poster</td>
<td></td>
</tr>
<tr>
<td>One thing you could do to improve your presentation and One thing you could do to improve your poster</td>
<td></td>
</tr>
</tbody>
</table>

Provide delayed feedback on the use of linguistic patterns as necessary.
3. Focus: Why we have rules and laws

Part 1:
In pairs ask students to discuss and note down:
- examples of rules and laws
- the reasons why the rules and laws are important in the home, school, society.
- The differences between rules and laws

Groups of 4 to share their ideas and provide improvement feedback

Give out a blank version of the grid below to each group for their completion

Elicit and share ideas on a class grid highlighting sentence starters:

<table>
<thead>
<tr>
<th>Rules</th>
<th>Laws</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Don't run in the classroom</td>
<td>1. Drive on the left</td>
</tr>
<tr>
<td>2. Hand in your homework on time</td>
<td>2. You cannot drive until you are 18</td>
</tr>
<tr>
<td>3. Wear school uniform</td>
<td>3. You cannot buy alcohol until you are 18</td>
</tr>
<tr>
<td>4. It is illegal to carry a gun</td>
<td>4. It is illegal to sell drugs</td>
</tr>
</tbody>
</table>

Reasons for these rules           Reasons for these laws
1. to prevent accidents in the classroom 1. to prevent accidents from happening on the roads
2. to make sure that all students learn 2. to make sure that drivers are adults
3. to help students feel that they are part of a school community 3. to make sure that young people don’t get drunk
4. so people will feel safe 4. so people will feel safe
5. so people won’t buy drugs and do silly things 5. so people won’t buy drugs and do silly things

The differences between rules and laws are:

- Rules are……
- Laws are……

Linguistic focus

Linguistic features
- **Recycle imperatives:**
  - Hand in your homework on time
  - Drive on the left

Help students to notice the following patterns to talk about reasons:
- You cannot + verb + until you are + age
- It is illegal to + verb …...
  - This rule / law is to prevent + noun + from verb
  - This rule law is to make sure that + noun + verb
  - This rule / law is so people will / won’t + verb

Help students to notice the use of present tense for defining rules and laws and stating their differences
- Rules are …
- Laws are …
- The main differences between rules and laws are …

Observation

Content
Observe students as they work together in their pairs and groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting how extensively and confidently (or otherwise) students are sharing ideas about rules and laws in terms of selecting them, giving reasons for them, explaining the differences between rules and laws and completing their grid

*Provide delayed feedback on problem areas as necessary*

Language
During group speaking and writing opportunities, observe and notice how effectively the students were using the linguistic features. Question and provide immediate, on the spot verbal feedback as necessary to groups and individuals. Make a note of some of the common problem areas and as feedback ask the whole class to help restructure some of the patterns used to express examples of rules and laws, reasons for them and to explain the differences between rules and laws using the patterns highlighted

*Provide delayed feedback and additional language focused activities as necessary*

Peer feedback
Observe how students share their ideas and help each other to improve their grids. Observe how well or if they give each other help with the linguistic patterns. Provide immediate verbal feedback on how they collaborate and share their ideas and encourage the sharing of constructive advice delivered in factual non judgemental ways

*Provide delayed feedback as necessary*
### Teaching and learning activities

**Part 2: Introduce the book, Learning About the Law.**
- Show the cover, pictures and index of the book and in small groups ask students to make predictions about the contents of the book and other features. Elicit and share ideas.
- Ask students to predict the questions the book might answer.
- Ask the students to guess 10 words they think will be in the book. Elicit and share ideas. Elicit and share ideas.
- Distribute the question sheet based on the first two sections of the book.
- In pairs, students discuss the questions they try to guess some of the answers.
- Read the first two sections to the students (pp. 1–9).
- Individually, students answer the questions then share and compare their answers with a partner.
- Elicit and discuss answers.
- Ask students to check with the list of words and questions that they predicted. Did they predict words accurately?

### Linguistic focus

**Useful collaborative dialogues students might want to use:** (keep on posters around the classroom if possible)

**Future forms ‘going to do’ and ‘will’**
- Making guesses using ‘going to do’ (guesses are made based on present evidence from the book) and ‘will’ (predicting what questions the book will answer).

**Asking and giving opinions, agreeing and disagreeing**

- A. I think this book is going to be about……
- B. Yeah, I've got more or less the same
- A. Because……

### Assessment for learning ideas

**Part 2: Observation**

**Content**
- Observe students as they work together in their pairs and groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting how well, or otherwise, students can hypothesise about the book, anticipating content, questions it will answer and key words that are likely to be in the book. Note how well they are able to answer questions based on the book sections.

**Language**
- During group speaking opportunities, observe and notice how effectively the students are using the linguistic features to ask for and give opinions, agree and disagree and to share their ideas. Question and provide immediate, on the spot verbal feedback as necessary to groups and individuals. Make a note of some of the common problem areas and ask the whole class to help restructure some of the patterns.

**Part 4: Focus: Who makes rules and laws?**

### Part 1: Who makes our rules and laws?

**Speaking:** Class elicitation and discussion

Ask students to look at lists made earlier of rules and laws. Discuss who makes them and classify as being made:

- at home
- at school
- at government level

Ascertain the students’ experiences and understandings by giving everyone time to complete the following statements:

**Rules at home are made by …**

- School rules are made by ...
- Laws in our local community are made by ...
- Laws in our State are made by ...
- Laws in Australia are made by ...

Keep these ideas to scaffold the students’ writing in the next stage.

### Assessment for learning ideas

**Language**

- Observe students as they work together in their pairs and groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting how well, or otherwise, students can hypothesise about the book, anticipating content, questions it will answer and key words that are likely to be in the book. Note how well they are able to answer questions based on the book sections.

- **Provide delayed feedback on problem areas as necessary.**

**Section 4: Observation**

**Content**
- Observe how well students are able to talk about who makes rules and laws.

**Language**
- Observe how well students are using the passive voice and ensure they know why the passive voice is being used here (The speaker/writer wants to put the most important information at the end of the sentence for emphasis. The important information is the DOER of the action (ie - Parents make rules at home / Teachers make rules at school). The DOER usually appears at the beginning of sentences BUT if we want the DOER to be in end position then we have to use the passive voice and the “by + DOER” pattern: ‘Rules at home are made by parents’)

**Provide delayed feedback and additional language focused activities as necessary.**
Part 2: Writing – Putting it all together

In this section, students put their learning so far together to produce a short explanatory written text.

Explain the text and show the framework below

Elicit ideas for success criteria from students OR provide criteria BUT ensure that students understand each point in the criteria. See column 3 (This can be simplified to meet the needs of the students)

In pairs discuss and plan their explanatory text

Students elect one scribe in the pair and write a rough draft of the explanatory text

The teacher collects up the rough drafts and redistributes them to other pairs for peer feedback using the criteria

Rough drafts are returned with feedback comments on the criteria sheet. Students read the feedback sheet and note improvement advice

Using the feedback students individually write up a final version of the text on a computer

Show students the framework for writing the explanatory text

Structure
- Para 1 describes what it is you are explaining: what rules are and what laws are, e.g. A rule tells you how to behave or act or do something. Use definitions and descriptions.
- Para 2 focuses on the main differences between rules and laws
- Para 3 focuses on explaining the reasons for rules and laws.
- Para 4 focuses on who makes our rules and laws and a very brief description of how (Meetings at home, school, Parliament etc)

Features
- Clear factual statements written in the present tense, rules are, laws are
- Use of conjunctions: so, then, because, as a result
- Passive voice: rules are made by...
- To improve my / your explanation I / you need to....

Inquiry
- Peer and self assessment (Elicit ideas for success criteria from students OR provide criteria BUT ensure that students understand each point in the criteria. Simplify criteria as necessary to meet the needs of the students)

Communication
- I / you understood the purpose of the text

Content
- I / you gave a clear definition of rules
- I / you gave a clear definition of laws
- I / you gave a clear and relevant explanation of the main differences between rules and laws
- I / you gave a clear explanation of why we have rules and laws
- I / you gave a clear and brief explanation of who makes our rules and laws

Organisation
- My / your paragraphs are complete
- My / your paragraphs are in a logical order

Language
- I / you used the present tense in statements and definitions
- I / you used words like: ‘then’, ‘so’, ‘because’ ‘as a result’ to link ideas
- I / you used phrases like: ‘to prevent...’, ‘so people will..’, ‘so people won’t..’, ‘to make sure that..’ to show reasons
- I / you used the pattern ‘are made by.’

Analysis of work
- Collect final texts. Copy them. Mark one copy and make feedback comments using the criteria sheet explaining what the student is doing well, needs to improve on and how

Self reflection
- Return UNMARKED copies to students for delayed self reflection against the criteria sheet

Teacher / student discussion
- To discuss achievements and improvement strategies. Give students the marked version of their text so that they can compare feedback.

Provide delayed feedback and additional language focused activities as necessary

Question and provide immediate, on the spot verbal feedback as necessary to groups and individuals. Make a note of some of the common problem areas and ask the whole class to help restructure some of the patterns<br>Observe how well the students use the present tense to talk generally about who makes rules and laws<br>Observe how well the students use the past tense to talk about specific school rules that exist now were made<br>*Provide delayed feedback and additional language focused activities as necessary*
6. Focus – Inviting a guest speaker: Formal or informal emails?

Part 1: The differences between formal and informal emails
In groups, provide students with a number of samples of formal and informal emails such as an informal, chatty email to a friend and an official letter requesting advice or assistance. Students identify the differences between the letters. As a class, build up a chart showing the main differences including aspects such as layout, format, formality of language, greeting and closure.

<table>
<thead>
<tr>
<th>Formal letters</th>
<th>Informal letters</th>
</tr>
</thead>
</table>

Part 2: Writing a letter of invitation
Explain that we want to write an email to the Principal to invite her to give a talk about how school rules are made. We need to include the following:
1. An address to identify the class
2. A date
3. A greeting
4. An explanation of the unit we are studying now (about rules and laws)
5. An invitation to the Principal to give a talk on who makes the school rules and how they are made
6. Explain that there will be questions at the end of the talk and give 4 examples
7. Include 'We hope she can give us the talk'
8. Include 'We are looking forward to hearing from you'
9. Closing

Elicit ideas for ‘end of speech questions’

Elicit ideas for success criteria from students OR provide criteria BUT ensure that students understand each point in the criteria. See column 3 (This can be simplified to meet the needs of the students)

In pairs discuss and plan their letter of invitation

Students elect one scribe in the pair and write a rough draft of the explanatory text

The teacher collects up the rough drafts and redistributes them to other pairs for peer feedback using the criteria

Rough drafts are returned with feedback comments on the criteria sheet. Students read the feedback sheet and note improvement advice

Using the feedback students individually write up a final version of the email on a computer

Select 3 best emails, show the class and the class vote on which to send to the Principal

Linguistic Structure
Focus on the structure and form of email writing for official or formal purposes, and the vocabulary necessary for this, e.g. date, formal greeting, body of text in paragraphs, respectful and slang-free tone, closure and signature.

A chart clearly demonstrating the differences between formal and informal letter writing would be useful for ongoing reference.

Observation
Part 1: Content and language
Observe students as they work together in their pairs and groups, questioning and providing immediate, on the spot verbal feedback as necessary to groups and individuals, noting how well, or otherwise, students can identify the differences in terms of layout and language of the formal and informal emails and how collaboratively they share their ideas within the group. Encourage positive collaborative behaviour.

Inquiry
Part 2: Self and peer assessment
Peer and self assessment (Elicit ideas for success criteria from students OR provide criteria BUT ensure that students understand each point in the criteria. Simplify criteria as necessary to meet the needs of the students)

<table>
<thead>
<tr>
<th>Communication</th>
</tr>
</thead>
<tbody>
<tr>
<td>I / you understood the purpose of the email</td>
</tr>
</tbody>
</table>

<table>
<thead>

</table>

Analysis of work
Collect final texts. Copy them. Mark one copy and make feedback comments using the criteria sheet explaining what the student is doing well, needs to improve on and how

Self reflection
Return UNMARKED copies to students for delayed self reflection against the criteria sheet

Provide students with teacher feedback based on the criteria

Students compare their own reflection with the feedback from the teacher.

Write up final version to be put in the students own learning portfolio

Provide delayed feedback and additional language focused activities as necessary
7. Focus – The Principal’s talk

Part 1: The talk
Review possible end of speech questions and ask students in groups to discuss and share additional questions if necessary
Nominate a panel of four students to pose the questions.

Emphasise good questioning skills—eye contact, body language, clarity of speech, ability to rephrase or delete a question that has already been answered.

Show students an empty flow chart to help them make notes about the process of making school rules (Ensure the Principal is briefed before the ‘talk’ to make use of a flow chart)

Students listen to the talk and the panel poses questions at the end of the talk to which the Principal responds

Apart from being a valuable oral language activity, a panel of students as questioners ensures that the Q/A session following the talk proceeds as planned and provides more focus than questions randomly posed from the floor. Make a video or sound recording of the talk and the questions and answers for later use.

Part 2: The flow chart
This is to revisit the idea of ‘flow charts’ in anticipation of the flow chart for the making of laws in Parliament in the next section of the unit. See resources: [http://www.parliament.vic.gov.au/education](http://www.parliament.vic.gov.au/education)

In class ask questions to help students to recall what happens first, second, third etc in the process of making school rules

In pairs, students complete their flow charts

Elicit students’ ideas and build up a class flow chart on a poster

Provide a clean flow chart and ask students to fill it in, illustrate and colour it. Mount the flow charts on the wall.

</tbody>
</table>

### Linguistic focus

Inquiry

REFER TO LEARNING INTENTIONS AT THE BEGINNING OF THE UNIT

The purpose of the 'What have I learned' section of the **KWL chart** is to encourage students to reflect on their learning, to verbalise or write it down so that they can make sense of and consolidate their learning and relate what they have learned to their own lives. At the same time it is a means for the teacher to check understanding and application so far.

### Inquiry

**Learning Journal entry**

- What new understandings have I gained from the unit so far? (Think of at least 2 things)
- What parts of the unit have I enjoyed so far and why?
- What parts of the unit have I not enjoyed so far and why?
- What areas am I not sure about?
- What do I need to do to improve and what steps do I need to take?
