Compost guy

First, our plants need stuff to grow. Those are green stuff, brown stuff, green stuff, and brown stuff. We should put apple cores, veggie peelings, teas, egg boxes, cardboard, and wood chips into the compost. We can't put plastic, cellophane, metal, or glass in the compost.

Ingredients to make Super Compost:

6 HELP

Otherwise it wouldn't have perfect

You should not use:

What we should put in our compost:

- Brown stuff: fallen leaves, straw and wood chips
- Green stuff: egg boxes, cardboard
- Those are green stuff: plant material, grass and hedges, churning
- We should put apple cores, veggie peelings, teas, egg boxes, cardboard
- We can't put plastic, cellophane, metal, or glass in the compost
Composting is Amazing

- The smaller the pieces, the faster they break down.

Compost
Dezi and Jonathan come and composting! have fun!

Greens

something that is like apple cores banana peel so basically it your food scraps

apple core

grass

Before

With the compost

With the compost bin only!

NO!

don't use

pet droppings

meat milk milk

milk/citrus

fish

glass/metal/wood/plastic

bones

grease

That goes in the compost bin only!
Compost is cool.

1. Greens: Collect scraps, grass clippings, coffee grounds, and weeds.

Browns: Add dried leaves, paper towels, toilet paper rolls, newspaper.

Tip: The smaller the pieces, the faster they break down.

Don't use fats, meat, cheese, bones, oils.
