Expression of interest: kiosc@swin.edu.au
Digital Careers Events

**Bebras**: The Bebras Computational Thinking Challenge for 2015 will run again between the 7 – 18 September. Year 1-12 students from around Australia are invited to participate in this nation wide challenge. Computational thinking and logic are seen as the foundation skills to structuring and solving problems. Bebras introduces students to these concepts in a fun, engaging way. The Challenge is free for schools and runs in a single classroom period. All you need is an internet connection. [More information.](http://atom.asn.au/atom/msmc2015/cfe5.html)

---

**ATOM competition: 2015 MY STORY MY CONTENT SHORT FILM COMPETITION**

**ATOM State Conference**

The 2015 ATOM Vic. state conference, New Perspectives, is an action-packed two days of seminars, workshops, inspiration and networking. Not to be missed!

---

**September School Holidays – NAO Workshops for Students!**

Swinburne University will be holding a NAO workshop for students over the September school holidays. NAO robotics course is designed to introduce students to programming and enable them to work closely with these robots. Students will be introduced to motion and sonar sensors, voice recognition and sound and vision tracking through hands-on practical activities which will bring the NAO robots to life.

**What is NAO?**

NAO is a little character with a unique combination of

---

- RoboCats is currently recruiting secondary school girls (14-18) for their 2016 team.
- In 2015, an all girls' Victorian team, ‘RoboCats’ competed in the FIRST Robotics Regional Tournament in Sydney and received the Judges’ Award.
- Interested students should contact Therese Keane ([tkeane@swin.edu.au](mailto:tkeane@swin.edu.au)).
- For further information see [http://www.melbournerobocats.org](http://www.melbournerobocats.org)
hardware and software: it consists of sensors, motors and software driven by a dedicated operating system. NAO gets its magic from its programming and animation. The workshop will be run over 3 days (9-3pm) on the 23, 24 and 25 September at Swinburne. For further information and registrations please see the following URL
These workshops will be available to students from Years 5-Year 9 and will be limited to 10 students per workshop.
The cost per workshop is $300

**Charlcs Latrobe College: Classroom of the Future**

**Webinar dates and topics Term 4, 2015:**

1. Social media for learning – the Yammer experience
   7th October, 4:00-4:40pm
   Respond via Eventbrite http://tinyurl.com/phqyvhs

2. STEM in schools – setting up a maker space and club
   21st October, 4:00-4:40pm
   Suitable for all teachers and leaders interested in helping students make and create.
   Respond via Eventbrite http://tinyurl.com/ndm4mbz

3. Coding in school – where to start? (Targeted at primary schools)

**SCSC Professional Learning sessions 2015**

These sessions provide a valuable opportunity to find out more about contemporary learning practices through five different sessions:

- What pedagogy really works in a flexible learning space?
  Wednesday August 26 9am to 3pm

- Using iPads to make student thinking transparent
  Thursday September 17 9am to 12pm

- Using the Solo Taxonomy to scaffold deep learning in classrooms
  Thursday September 3 9am to 12pm

- Learning analytics and how data can be used to inform teaching and build student independence.
  Wednesday September 9 9am to 12pm
4th November, 4:00-4:40pm
Respond via Eventbrite
http://tinyurl.com/oddkdbj

4. Leading digital change in schools – lessons for digital leaders
18th November, 4:00-4:40pm
Respond via Eventbrite
http://tinyurl.com/ozluaph

Data collection and analysis tools for the contemporary classroom
Wednesday September 9 1pm – 4pm

**Resources**

- **The Ultimate STEM Guide for Kids: 239 Cool Sites About Science, Technology, Engineering and Math**: STEM websites, challenges, contests, Awards, career resources, initiatives, games and apps. Although this site is sourced from U.S. there is a lot of relevant resources for Australian STEM teachers to access.

- **Each fortnight we feature one of our Digital Deck cards. The Digital Deck features digital resources, providing an overview, how to get started, and ideas for the classroom. For the full version of Digital Deck, visit** https://fuse.education.vic.gov.au/pages/View.aspx?pin=J7QNR9

- **If you have any of your own ideas for Digital Deck cards and would like to submit them to the Digital Learning**
Digital Deck 5: What are…Web Mapping Services?

Web-mapping is the process of generating and delivering maps and geographical information via the world wide web. Google Maps is a well known example of a web-mapping service. This service provides tools that allow you to search for residential addresses, business locations and landmarks across the world. See satellite images of areas you select, pan and zoom identified areas, plan travel routes and discover information about places globally. Web-mapping services can offer a range of maps to view, including topographic maps, street maps and maps with geographic features highlighted.

Getting started today

- Explore some web mapping services. You can start by trying:
  - Yahoo Maps http://maps.yahoo.com
  - LiveSearch Maps http://maps.live.com
  - Where Is www.whereis.com
  - Try Google Earth. This is a virtual globe which allows you to fly anywhere on earth and zoom in to see satellite images, photographs, 3D buildings and terrain around the globe. You will need to download the program. http://earth.google.com

Ideas for the classroom

- Use web-mapping to locate places where significant historical events have taken place e.g. Egypt, World War I and World War II sites.
- Get students to identify landmarks and make hypotheses about the climate, population, wealth, etc.
- Use web-mapping to plot a path for excursions or map and calculate the distance for alternate routes.
- Take virtual tours of countries you are learning about e.g. pinpoint places where pen pals live, where students were born, etc.
- Place historic and current and information about your local area on a Google Map. Record interviews and add these too.
- Use web-mapping to locate and find out more information about global news events e.g. volcanoes,
New Vision for Education: Unlocking the Potential of Technology: To thrive in a rapidly evolving, technology-mediated world, students must not only possess strong skills in areas such as language arts, mathematics and science, but they must also be adept at skills such as critical thinking, problem-solving, persistence, collaboration and curiosity. All too often, however, students in many countries are not attaining these skills. In this context, the World Economic Forum has taken on a multi-year initiative, New Vision for Education, to examine the pressing issue of skills gaps and explore ways to address these gaps through technology.

In this report, we undertook a detailed analysis of the research literature to define what we consider to be the 16 most critical “21st-century skills”. Our study of nearly 100 countries reveals large gaps in selected indicators for many of these skills – between developed and developing countries, among countries in the same income group and within countries for different skill types. These gaps are clear signs that too many students are not getting the education they need to prosper in the 21st century and countries are not finding enough of the skilled workers they need to compete. To read more download the paper: http://www3.weforum.org/docs/WEFUSA_NewVisionforEducation_Report2015.pdf

What Works Best in Education: The Politics of Collaborative Expertise- John Hattie
In a companion paper (What Doesn’t Work in Education: The Politics of Distraction), John set out a long list of policy prescriptions, which, he argues, are unlikely to have the impact we are looking for. This is that every student, irrespective of where they are starting from, makes at least a year’s worth of progress for a year’s worth of input. John’s objective in this paper is to set out how we can achieve this goal.

His starting point is that the variability between schools in most Western countries is far smaller than the variability within schools, or, more simply, that it matters much more which classroom you go to than which school. Which takes us directly to the question of how to increase the expertise of all teachers . . . At the heart of John’s answer is the notion of collaborative expertise, of all parts of the education system working to the above goal, knowing their impact and reacting accordingly. https://www.pearson.com/content/dam/corporate/global/pearson-dot-com/files/hattie/150526_ExpertiseWEB_V1.pdf
Promote SchoolMate to Parents at Your School: Thanks to all those schools sharing the word about our SchoolMate app with your parents. We have had over 6000 downloads so far. Help us reach thousands more parents by continuing to spread the word about SchoolMate. (DET School Update, 2nd June 2015)

Please feel free to pass this on and contact me on blanks.marcellinus.b@edumail.vic.gov.au if you have something you wish to share.
