

emerging
sciences
victoria

Inspire your students to excel in STEM in a virtual world.

Emerging Sciences Victoria (ESV) is a real time virtual classroom for Year 9 and 10 students delivering inspirational STEM subjects including:

- Frontiers of Physics
- Nanotechnology and Nanoscience
- Neuroscience
- Biotechnology and Bioinformatics
- Mathematics

Students immerse themselves in 2 one-hour classes per week over 15 weeks. Each student will be given homework, and will complete an assessment, with a report and certificate issued at the end of semester.

Give your students an opportunity to pursue their love of science through ESV.

All subjects have limited numbers, so register today.

SEMESTER 2 Registrations close: 21 June 2017
