

## 100 WC

But then the flash made me faint and I could not describe this moment. I was in hospital this operation took days till it was finished because they said you broke a couple of bones so that process took a very long time now how I ended up in the hospital was I was playing basketball and then hit a metal pole and collapsed to the ground I was then rushed to the hospital and I successfully recovered and was in full performance and could go back to playing basketball and that's it.
