An invitation is extended to all academics and students to the Variational Analysis Down Under Conference 2018, which will bring together mathematicians from around the world and locally to present their research on variational analysis and its applications to optimisation.

The event is in honour of Professor Asen Dontchev’s 70th birthday. Asen has made significant contributions to optimisation and other fields of mathematics.

Keynote speakers:
- Prof Regina Burachik, University of South Australia
- Prof Asen Dontchev, University of Michigan
- Prof Lyudmila Polyakova, St Petersburg State University
- Prof Terry Rockafellar, University of Washington
