37. What are some suggested features you would like to be added to Moodle to use in your teaching?

Unsure.
Better editing function for quizzes, function to show which students are active, easier move/delete/rearrange functions for uploads.
I really know very little about Moodle and its capacity. I have not seen any training or manuals to help me use Moodle.
Not sure - Limited experience.
Make marking easier on moodle.
Not sure if it has video capability. Drop box for student work would be great.
Not sure, the time needed to set up everything on moodle and the fact that IT stopped pushing it has meant I have not really put in the necessary time and effort to make Moodle really work for me.
Nothing- rather not use it
None that I can think of

38. What are the benefits of using Moodle for teaching and learning in your experience?

Clearly there are many benefits in terms of engaging students and allowing them to have access to files etc.
Sharing documents
greater accountability
Having somewhere to post homework, activities and course materials
I can see the benefits but haven't always had the time to set it all up.
Students know how to log in and download files.
Allows students to access electronic copies of material eg assessment sheets. Especially helpful with Year 12 and encouraging independent learning as it can put ownership on students.
Having a place here students can access learning. Tools, worksheets etc is very useful. I personally haven't explored as much of Moodle as I would like to.
Less printing, directing students to resources which will not get lost and can be accessed at any time.
It is a good content organisation tool but I don't find it very useful for online learning, e.g. the Moodle lessons are quite static - haven't tried many other feature - hard to programme.

I don't know of its benefits as I rarely use it, I would really love an IT time in PD to be shown its capabilities, I would not whom to ask for help nor what to ask about how I could use Moodle.
