

A Humble Solution. 

The greatest scourge upon our society, it consumes our resources, takes our jobs and even has the audacity to earn more money doing it. This issue is global, stretching worldwide and covering every female in existence. So what caused this issue? Men. Realistically all issues are caused by men, without them there would be no war, no capitalism or communism nor any political or domestic issues. It is a full-scale oppression. In fact only 1% of the worlds titled land is owned by females. 79% of managerial or positions of power are male dominated. Even arts based communities are dominated by men! 9 out of 10 movies are still directed by them!

The issue is evident, but what may we do about it? Well, ladies, those of us whom believe in overcoming this issue have been branded by the vermin as “FemiNazis”. Ironically enough they belittle us by making reference to a truly evil male. Leader of the Nazi party and the reason millions were needlessly slaughtered. Adolf Hitler. If this is the attitude they take to their superiors then maybe the best course of action is to become what they think of us. Initially the introduction of strict laws regarding the freedom of males will be a sufficient first stride. Continuing this we shall take the right for them to hold wealth. Their full estates will be transferred to their closest female kin. Once we have managed this we shall initiate a second phase. With their power and ability to rebel destroyed we shall then take control. Introducing curfews and the requirement for men to be supervised by women when in transit and any times where a male may be in public. These small laws are just some of the examples of how we could quickly, and efficiently move into a golden age of the human race.

Ultimately once men have been reduced to little more than the house puppy we will need to find a better use for them. Throughout history, men have flaunted strength and labour skills, so we shall exercise this self-proclaimed affinity and use them for any work we need. Construction, mining and any other hard labour the more civilised folk won't want to do. Those who prove useless at any task we give them will no longer be needed and so can be disposed of. I put forward that these specimens be placed in a gladiatorial setting where they may battle for their lives and for a chance of being placed in the breeding group. This will create an income source from the entertainment value brought by the gladiators as well as natural selection producing the best children possible.

Overall, this proposal is flawless in every respect, by eliminating world issues we would also be bringing in a time of prosperity for the human race, the overall improvement of the human genetic pool and a road to a peaceful, understanding and compassionate world.
